

New call for applications for the University of Klagenfurt Technology Scholarships

New call for applications for the University of Klagenfurt Technology Scholarships

The fourth submission deadline for the summer semester 2022 has been opened.

The **positive development of the regional labour market in the sector of Information and Communications Technology (ICT)** has resulted in an **increasing demand** for skilled professionals. The University of Klagenfurt is responding to this demand by training **highly qualified specialists in the ICT sector** and awarding the **University of Klagenfurt Technology Scholarships**, which aim at:

- increasing the number of highly qualified ICT professionals,
- enhancing diversity in the Federal State of Carinthia and at the University of Klagenfurt,
- increasing the number of international students at the University of Klagenfurt, and
- promoting the University of Klagenfurt's internationalization efforts.

Scholarship holders shall be enabled to finance the second year of their Master's degree programme with a paid internship, which is also part of the curriculum. So far, in cooperation with the **Carinthian Chamber of Commerce (WKO)** and **Federation of Austrian Industries (IV)**, scholarship holders have been supported in finding a paid internship in the first year of their Master's

degree programme.

Based on an agreement with the University of Klagenfurt, the OeAD has published the call for applications and will accompany the selection process, award the scholarships and offer its services to the selected scholarship holders before and during their stay in Austria.

Eligible for application are students who

have **completed a Bachelor's degree** in an ICT study field, **in one of the following countries/regions**: Albania; Algeria; Argentina; Belarus; Bosnia and Herzegovina; Bulgaria; Croatia; Democratic Republic of Congo; Egypt; Estonia; Greece; Israel; Jordan; Kosovo; Latvia; Lebanon; Libya; Lithuania; Montenegro; Morocco; North Macedonia; Palestinian territories; Poland; Portugal; Romania; Russian Federation; Serbia; Slovenia; Syria; Tunisia; Turkey; Ukraine; Uruguay; Uzbekistan

and who are interested to pursue one of the following Master's degree programmes

- Master in Mathematics
- Master in Game Studies and Engineering
- Master in Informatics
- Master in Information Management
- Master in Information and Communications Engineering (ICE):
 - Branch of Study Autonomous Systems and Robotics
 - Branch of Study Networks and Communications
 - Branch of Study Business Engineering

Women are expressly invited to apply. Altogether a maximum of 12 scholarships will be awarded.

On Wednesday, May 26, 2021 at 3 p.m (CET) an online info session with detailed information about the scholarship programme and the application procedure will be offered via the following link ()
