Research capacity building to strengthen  
Empirical Education Research on Social  
Cohesion and Equity in Kosovo

## Join us to analyze social cohesion and equity in the Kosovan education system!

Questions around equity and social cohesion are widely discussed in academia and society. However, so far, we do not have much empirical evidence to inform such debates. Especially data from national and international studies have been underutilized to study questions of equal opportunities in the Kosovan education system.

We are looking for academics (junior/senior from related disciplines in the social sciences and humanities) who would like to join our research project aiming to conduct secondary analysis of existing data sets to gather more empirical evidence around equality issues in the Kosovan education system. Together with an experienced team of researchers from University of Graz (Austria), University of Mitrovica "Isa Boletini", University of Prizren "Ukshin Hoti" and the University of Prishtina "Hasan Prishtina", Kosovo, you will contribute to a book project and a national stakeholder conference aiming to bring issues on educational equality on the policy agenda.

Become part of our EduReaKos-Researchers network in which you will work together with academics from various universities and also participate in capacity building activities aiming to strengthen your skills in quantitative analysis of survey data as well as publishing and presenting your research in English language.

**Project duration:** December 2021-May 2023

**Requirements:** Academic degree in teacher education or related disciplines. Preference is given to people with disabilities and members of minority groups.

Participants will be expected to participate in and contribute to all project activities as the content will be interconnected, so attendance at each of these workshops is required for all participants.

If this has aroused your interest **then apply now till October 24th at the latest at the following link:**
